

# CONTENTS TO VOLUME 44

*Vol. 44 No. 1 January 1989*

|                                                                                                            |    |
|------------------------------------------------------------------------------------------------------------|----|
| D. K. OJHA and S. C. JOSHI / Spectrophotometry of Comet Bradfield (1987s)                                  | 1  |
| E. M. DROBYSHEVSKI / Jovian Satellite Callisto: Possibility and Consequences of its Explosion              | 7  |
| T. D. PADALIA / Photoelectric Photometry of Comet Bradfield (1987s)                                        | 25 |
| S. YABUSHITA / Galactic Tidal Perturbations of Long-Period Comets and the Distribution of the Inclinations | 29 |
| Y. MEKLER and M. PODOLAK / Spectrophotometric Observations of Comet Austin (1982g)                         | 39 |
| Z. KOPAL, M. MOUTSOULAS, and F. B. WARANIUS / Bibliography                                                 | 47 |

*Vol. 44 No. 2 February 1989*

|                                                                                                                                                                   |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| V. LALAJA, V. P. N. NAMPOORI, and R. PRATAP / Strange Attractors in the Saturn Ring System                                                                        | 105 |
| E. WILLERDING and H. J. FAHR / Instability Considerations at Self-Gravitating Circumplanetary Ringlet Structures                                                  | 121 |
| JUN-ICHI WATANABE and TAKUMI ABE / Periodic Activity of Comet Bradfield 1987s                                                                                     | 141 |
| SHIGERU IDA, YOSHITSUGU NAKAGAWA, and KIYOSHI NAKAZAWA / The Rayleigh-Taylor Instability in a Self-Gravitating Two-Layer Fluid Sphere                             | 149 |
| PAOLO FARINELLA, A. CELLINO, V. ZAPPALÀ, and P. PAOLICCHI / Is Nereid a Binary Satellite?                                                                         | 175 |
| N. SHRIVASTAVA, S. SHRIVASTAVA, S. D. DIXIT, and A. N. SHRIVASTAVA / Evening and Morning Twilight Enhancement of $\lambda$ 5577 Å Atomic Oxygen Line at Allahabad | 181 |
| C. DEBI PRAŞAD and J. N. DESAI / Imaging Fabry-Pérot Observations of [OI] 6300 Å Emission in the Coma of Halley's Comet 1982i                                     | 191 |
| Letters to the Editor                                                                                                                                             |     |
| P. S. GORAYA, H. K. DUGGAL, R. K. SRIVASTAVA, and WAHAB UDDIN / Variation in Comet P/Halley                                                                       | 197 |
| KENT D. TREGO / Comparison of Enhanced Mariner 9 and Viking Imagery of Mars for Analysis of Short Term Geological Phenomenon                                      | 199 |

|                                                                                                                                                         |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| J. LUKKARI / Velocity Dispersion in Particulate Disks with Size Distribution                                                                            | 207 |
| JAMES W. HEAD and L. S. CRUMPLER / Divergent Plate Boundary Characteristics and Crustal Spreading in Aphrodite Terra, Venus: A Test of Some Predictions | 219 |
| B. S. RAUTELA, P. S. GORAYA, B. B. SANWAL, and S. K. GUPTA / Spectrophotometry of Comet Hartley-Good (1985I)                                            | 233 |
| P. S. GORAYA, B. B. SANWAL, B. S. RAUTELA, H. K. DUGGAL, and J. S. MALHI / Spectrophotometry of P/Halley (1982i)                                        | 243 |
| RONALD G. TABAK and WARREN M. YOUNG / Cometary Collisions and the Dark Material on Iapetus                                                              | 251 |
| J. J. RAWAL / Contractions of Subsolar Nebulae                                                                                                          | 265 |
| OSMAN M. KAMEL / Application of Hori Technique in General Planetary Theory Letters to the Editor                                                        | 275 |
| P. S. GORAYA, R. V. BIJU, H. K. DUGGAL, and J. S. MALHI / The Visual Brightness Behaviour of P/Halley during 1982-1986                                  | 291 |
| J. J. RAWAL / Planetary Distance Law                                                                                                                    | 295 |
